# HHE Series:

## HERITAGE LANTERNS!

### HISTORIC HERITAGE SERIES JOINS GROWING WILLIAMS OUTDOOR LINE!

The Heritage Lantern Series (HHE) from Williams Outdoor combines contemporary lighting with the character of an old-time gaslight. Carefully detailed features include an ornate cast aluminum housing, and a hinged and sealed bottom access door and "aerator" top (historically used to light the lamp and allow hot air and gases to escape).

The dome detail is available in painted spun aluminum for your choice of colors or an opal acrylic dome provides a soft glow and subtle uplight.

Our HHEO16 with its opal acrylic diffuser produces pleasing uniform illumination, while the prismatic glass refractor on our HHER16 allows for field-adjustable Type III or Type V distribution.

The antique charm of this gaslight-style post top luminaire is perfect for neighborhoods, shopping centers or historic applications.
