ICEC15 Series:

100,000-Hour Icetron™ Cylinder!

15" INDUCTION CYLINDER FROM WILLIAMS DOWNLIGHTING—100,000 HOURS MAINTENANCE FREE!

Williams Downlighting introduces the ICEC15—designed for Sylvania Icetron™ lamp systems to deliver an exceptional 100,000 hours of high-quality white light in applications where re-lamping is inconvenient or expensive. Durable heavy-gauge aluminum construction dissipates heat for cooler operation.

FEATURES:

- 100,000-hour lamp life significantly reduces maintenance where re-lamping is inconvenient or expensive.
- 5-year warranty for parts and labor on Icetron lamp and generator system.
- Induction lamps provide excellent lumen maintenance—70% at 60,000 hours.
- 100W and 150W systems operate in ambient temperatures as low as -40°C.
- 35°C maximum ambient operating temperature.
- Instant-on/Instant re-strike.
- Low EMI—complies with FCC non-consumer limits.
- This fixture is proudly made in the USA.
