OGM Series:

THREE DOME LUMINAIRES!

THREE NEW DECORATIVE LUMINAIRES ADDED TO WILLIAMS OUTDOOR LINE!

The simple clean look of the dark sky-friendly OGM Series will complement a wide variety of outdoor applications including retail centers, common areas, and walkways. Engineered for easy installation and maintenance, these decorative luminaires feature a removable ballast tray and Williams' exclusive self-leveling twist-lock fitter.

The lensed OGMD18 and OGMD24 feature a fully-rotatable, segmented reflector which allows three different distribution types to be oriented and fine-tuned on-site. Secured with stainless steel hardware, the door's high-impact, heat-resistant tempered glass lens is silicone-sealed to reduce infiltration of bugs and dirt.

The OGMO18 features an open dome with a highly reflective finish and exposed lamp to add brilliance to a variety of outdoor applications.
