

OGO INSTALLATION INSTRUCTIONS

**** Installation of these products should only be performed by a qualified electrician. ****

1. Carefully unpack fixture and mounting hardware from carton taking precaution not to scratch globe or finish during the installation process.
2. Being sure that all electrical power is turned off, plug the prewired female service connector at the base of the slipfitter into the male service connector at pole.
3. Slide the fixture's integral slipfitter over the pole.

4. Insert the (4) 3/8-16 socket head set screws as illustrated. Use the set screws to level the fixture. Once level, tighten set screws.
5. Install lamp.
6. Install globe by lowering over fixture until it rests on fixture base. Turn globe to engage screw thread and tighten. Tighten set screw (Fig. A) from underneath when done.
7. Connect power and ground connections to the fixture using UL approved connectors at the pole, per applicable local codes.

Note: Refer to individual product specification sheet for fixture details.
