A Visible Difference™

Designer Series

Customized, built-to-order cylinders that allow the customer to be the designer. With several standard options available, a design can be created to accent almost any architecture.

Standard Panel Options

Perforated Side Panels - 40% open perf provides a subtle side luminous appearance.

Laser-Cut Side Panels - Personalize each fixture with a company logo, school colors, or custom design.

Powder Coated Side Panels - Choose from a variety of colors to complement any application.

Printed Graphic Side Panels - Select a favorite print or artwork to create an architectural design.

Acrylic Side Panels - Diffuse white acrylic panels provide a uniform, luminous effect.
