

# Williams' HET –

# It Stands Up To Even the Toughest Competition.

# HET

**WILLIAMS'**  
**FEARLESS. EFFICIENT. A WINNER!**

In the competitive world of commercial lighting, the HET is comfortable riding at the front of the pack. Proudly made in the USA with 22-gauge C.R.S., the HET stands up against the best of them.

In fact the HET can compete on two levels: T5 or T8, providing efficiencies up to 90%. Williams' standard paint after fabrication makes the HET easier to handle, while the 92% highly reflective matte white paint increases photometric performance.

Unlike the competition, the HET features a single-piece diffuser that can't get separated from the fixture, and tool-less room-side ballast access for an efficient and attractive alternative to a standard troffer.

So have no fear when specifying Williams' high efficiency troffer. In the commercial lighting industry, our HET stands up comfortably to even the toughest competition.

 **Williams**  
FLUORESCENT LIGHTING

## FEATURES

- **This fixture proudly made in the USA.**
- One-piece frosted acrylic diffusers won't become separated from fixture.
- Available with either T5 or T8 lamping.
- Frosted acrylic diffusers combined with highly-reflective matte white paint provide high optical efficiencies while not sacrificing visual comfort.
- Shallow fixture depth of 3-1/2" allows for use in limited plenum applications.
- Optional anti-microbial powder coating available to prevent the spread of dangerous micro-organisms and suppress the growth of mold and bacteria.
- Tool-less access to the electrical from the room-side of the fixture.
- Integral T-bar clips quickly secure fixture to structure.
- Attractive architectural fixture that delivers comfortable, uniform lighting in an energy efficient manner.
- All parts painted after fabrication to facilitate installation, increase efficiency, and inhibit corrosion.

## SPECIFICATIONS

- HOUSING – 22-gauge die formed C.R.S.
- SHIELDING – Ribbed acrylic diffuser.
- FINISH – Highly-reflective textured matte white powder coat with multi-stage iron/phosphate prepared metal.
- ELECTRICAL – Electronic ballast standard, program start T5, instant start T8, rated Class P.
- LABELS – UL/CUL listed as recessed fluorescent luminaire suitable for dry or damp locations.
- MOUNTING – NEMA Type "G" standard. For flange installations use the Drywall Frame-In Kit (DFK), sold separately.

### OPTICAL EFFICIENCY
