

# LP5

## LOW PROFILE T5 Parabolic

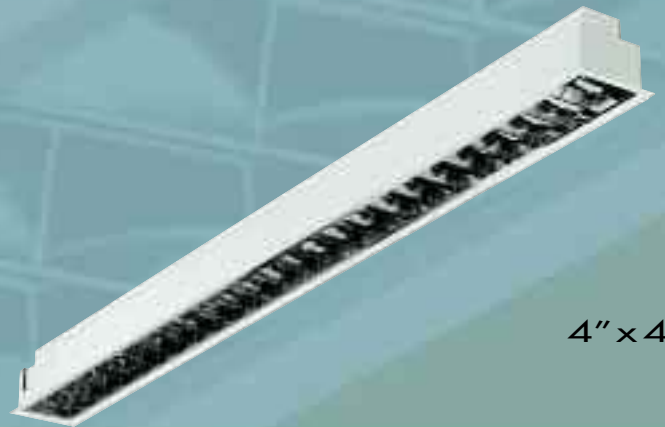

2'x2'

### LP5

Finally, a troffer that matches the high-performance of the T5 lamp. The **LP5** is your new choice for general area lighting with T-grid or hard ceilings.

"**LP**" for low-profile - just over two and a half inches tall! Use the LP5 in tight plenums where conventional troffers simply won't fit.

"**5**" for T5, the emerging standard for general area lighting provides high efficiency, long life, lumen maintenance and optical control.

4'x4'

A Visible Difference

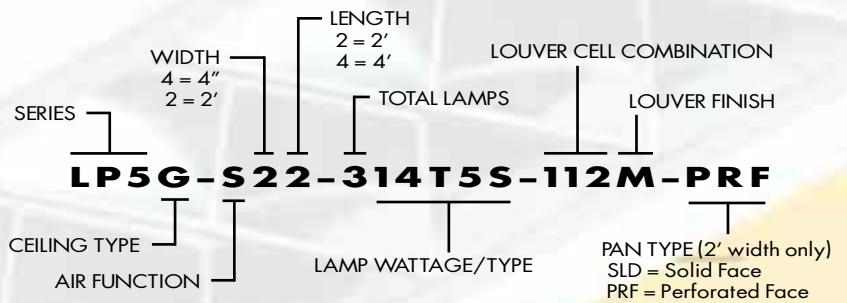

The LP5 gives you RP-1 glare control, a wide variety of lumen packages, and an attractive design that effortlessly replaces conventional T8 and T12 troffers. Lightly perforated median strips give the fixture just a bit of sparkle.

Use the 2' wide LP5 to provide general area lighting with 8'x8' or 8'x10' center-to-center spacing, or use the 4" wide LP5 to direct light accurately over work surfaces or retail displays. You can even specify a wall-washing LP5 to effectively illuminate wall displays or hallways.

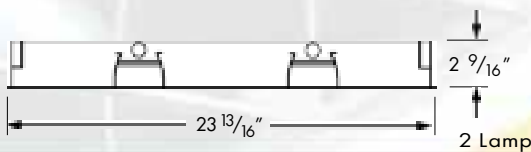

Refer to specification sheets for complete ordering information.

## ORDERING INFORMATION

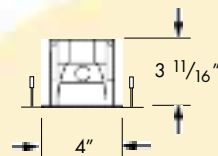

## CROSS SECTIONS

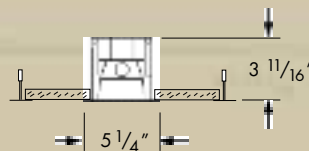

### 2'x2' and 2'x4'

### 4" x 2' and 4" x 4'

Use with T-bar supporting sides and ends. T-bar to be 4 1/4" on center widthwise.

Use with T-bar supporting the fixture from ends (EQ clips secure fixture to T-bar and allow the sides to support ceiling tile).
