

# EFTR & HETR RETROFIT KITS— THE “EXTREME MAKEOVER” FOR TROFFERS.

## TOOLS ~~REQUIRED.~~

## EFTR & HETR

Williams' new EFTR and HETR retrofit kits offer a one-tool solution for replacing unattractive, outdated, less-than-efficient troffers and parabolics that are in dire need of a makeover.

The architecturally pleasing EFTR and HETR are engineered for excellent illumination, high efficiency, easy installation and maintenance, and feature the same attractive design elements and quality construction of Williams' popular HET and EFT efficient troffers.

Available in two sizes and two styles, Williams' Retrofit Kits install with a single screwdriver and provide numerous configurations to complement any project.

When facing your next extreme makeover candidate, don't look away. Select Williams Fluorescent EFTR or HETR. Like any successful makeover, the transformation will impress even the toughest crowd.
