

IC RATED RECESSED DOWNLIGHTING

4 1/2" & 6" APERTURE

COMPACT FLUORESCENT & INCANDESCENT

Infinity offers the IC Rated Series of recessed downlights — suitable for high-end residential and a wide variety of commercial applications with direct contact with insulation. Specify 4 1/2" or 6" aperture downlights in either incandescent or compact fluorescent to meet various energy codes.

Product features include field adjustability for up to 2" ceiling thicknesses, field rotatable wall-wash optics regardless of the fixture orientation, 55° cut-off of the lamp and lamp image, and compatibility of up to 42 watt triple-tube fluorescent and up to 100 watt incandescent.

A Visible Difference

QUALITY LIGHTING

IC Rated downlights are available with optional Micro-Baffle (MB), Luminous Disk (LD), Accent Cone (AC), and Wall Wash (WW) – or choose from eight different reflector finishes to put the finishing touch on your next project.

For additional energy savings, choose IC Rated downlights with the Airtight Housing option (ATH) which complies with ASTM-E283 standards and the Washington State Energy Code.

With superior quality and service second to none, let Infinity Lighting make A Visible Difference® on your next project.
